

**KARTO Surveys & Mapping** was established in 2009, a young dynamic company that aims to become your leading geospatial supplier by providing reliable, professional and innovative aerial surveys & GIS solutions at cost-effective rates. We aim to supply superior information services by being client-focused & quality-oriented in our approach with no project too big or small.

**Our expertise include:**

**Surveys & Data Capture**

- Aerial Photography
- [Oblique Aerial Photography](#)
- [Aerial Surveys](#)
- Topographical & Engineering Mapping (2d & 3d)
- DEM, DTM & Contours
- 3D Building Models for Urban Design
- Orthophoto's
- Geo-referencing of aerial photography & maps
- Survey (CAD) drawings
- Vectorising & Digitising
- GIS database design & data capture
- [Historical Mapping](#)  
(sourcing aerial photography, processing, 3d data capture & orthophoto's from as early as 1935)

**Mapping Services**

- Tourist Maps
- Topographical Maps
- Book Illustrations
- Orthophoto Maps
- Location/Direction Maps
- Historical Map Searches for publication
- Street Maps
- Route Maps

Karto staff members have a wide range of experience in all facets of photogrammetry, cartography, GIS and the geospatial industry. Our people are passionate about mapping and strive to extract the best from our technologies driven by project outcome.

Karto focus exclusively on the capture, analyse and data management of geospatial information. Our recent projects include:

- Change detection over a period of 70 years to establish building restrictions along the West Coast.
- Impact assessment of large explosives.
- Determining the 100 year flood level along river banks.
- Providing height models for drainage & stormwater planning.
- Cartographic mapping of the Agulhas Plains.

**How can we assist you?**
